

## **JOB DESCRIPTION**

**Position:** Multipurpose Driller

**Department:** Operations

**Location:** Tarkwa/Operations Site

**Reports To:** Shift Supervisor

**Category:** Senior Staff

---

---

### **Position Summary:**

The role is an outdoor one which requires working with bare hands with a basic understanding of machines and science. The driller will be required to travel to different worksites and assist the crew/shift supervisor in basic drilling techniques/activities. Progressive work and experience can lead to the incumbent being responsible for shift crews. The drilling job is ideal for an individual who likes to work with both his or her hands and mind.

### **Responsibilities:**

- Verify positions and depth of drill locations before drilling to determine if it is safe to move forward with the process.
- Check gauges, monitor drilling conditions, and pay close attention to equipment to decide if it needs to be altered or adjusted during drilling.
- Use knowledge of soil or rock conditions to determine which drill is appropriate for each job.
- Stop, start, and control drilling machine speed and align as well as position drills to stabilize machines.

- Regulate downward pressure, rotary speed, and air pressure, depending on the type of material the drill is moving through, changing procedures and settings for each individual job as needed.
- Drill holes in rock for routing, anchoring, blasting, or building foundations, working with other members of the crew to ensure accuracy and safety.
- Follow all protocol and standard operating procedures to guarantee safety and compliance on the job site and keep team members safe from injury.
- Position and assemble casing pipes, augers, machines, and other equipment with the appropriate hand and power tools.

### Education/Experience

- Previous 6 - 8 years of experience on a drilling site
- Mechanical skills
- Must possess all Drilling related Licenses
- Company background check and drug screening
- Ghanaian Driver's License with an acceptable driving record that meets company standards
- Good knowledge of down-hole equipment i.e., Hammers back-end barrel assembly (RC Drilling and Diamond Drilling)
- A good safety record
- Good record keeping skills (handwriting, English literacy skills)
- Show good leadership values
